# 3 | EYES & EARS

Eye and ear protection are required at all times.

# 4 | THE BASICS

Always follow the four basic firearm safety rules.

## ALWAYS keep the gun pointed in a safe direction

This is the primary rule of gun safety. Common sense dictates the safest direction depending on different circumstances.

## ALWAYS keep the gun unloaded until ready to use

If you do not know how to open the action or inspect the chamber, leave the gun alone and get help from someone who does.

## ALWAYS keep your finger off the trigger until ready to shoot

When holding a gun, rest your finger alongside the frame and outside the trigger guard. Do not touch the trigger until you are actually ready to fire.

## KNOW your target and what is beyond it

Be absolutely sure you have identified your target. Be aware of the area beyond your target. This means observing your prospective area of fire before you shoot. Never fire in a direction in which there are people or any other potential for mishaps.
